

Adrianus Silalahi

Medan, Indonesia | adrianussilalahi766@gmail.com | +62895332216003 | [LinkedIn](#) | [Portfolio](#) | [Github](#)

Highly disciplined Fullstack Developer and Summa Cum Laude Informatics graduate. Developed and deployed comprehensive web platforms using React.js, Next.js, and Node.js, alongside experience integrating Python-based machine learning workflows. Having directed development teams in academic projects and collaborated within cross-functional agile teams at Telkom Indonesia, I am currently seeking a Junior Fullstack Developer role to deliver high-impact solutions.

Work Experience

Bodat Chic Sec / Online shopping platform for my thrift business	Medan, Indonesia
Founder & Fullstack Web Developer – bodat-chic-sec.shop	Apr 2026 – current
- Engineered full-stack e-commerce platform enabling online thrift shop operations using Next.js, TypeScript, Node.js, and MongoDB. - Implemented 9 core e-commerce features including JWT-based authentication, shopping cart, checkout flow, and order management system. - Crafted admin dashboard for product catalog management with real-time analytics tracking 6 key business metrics (orders, revenue, users, inventory, paid/unpaid). - Deployed on Vercel with Stripe payment integration, enabling secure transaction processing for purchases.	

Telkom Indonesia / Largest telecommunications company in Indonesia	Jakarta, Indonesia
Fullstack Developer Intern	Feb 2024 – Jun 2024
- Engineered 10 user-facing features for internal AI chatbot platform (conversation history, bookmarking, and smart recommendations) using React.js, TypeScript, SCSS, PostgreSQL, and Prisma, serving 5,000+ Telkom employees. - Resolved 26 critical bugs during V1 to V2 migration including broken registration flow and mobile UI inconsistencies, ensuring successful production deployment with zero blocking issues. - Explained bug root-cause analysis and system architecture through comprehensive technical documentation, facilitating seamless knowledge transfer to incoming developers. - Integrated 15 RESTful API endpoints enabling seamless frontend-backend communication. - Collaborated in 8-person cross-functional Scrum team, utilizing Git/GitLab for version control and supported CI/CD automation within development workflows.	

Education

Mikroskil University - B. Eng in Informatics	Medan, Indonesia
GPA: 3.86/4.00 (Summa Cum Laude).	Oct 2021 – Oct 2025

Projects

Jagoan Soal / AI-powered tool to generate questions	Mar 2026
Full-Stack Web Application – Jagoansoal.app	
Developed a user-friendly exam generator using Next.js, TypeScript, and Gemini AI that eliminated prompt engineering complexity and enabled non-technical users to create questions across 12 grade levels with a single click.	

SentimenAI / Bachelor's Final Project	Feb 2025 – Jul 2025
Team Lead & Fullstack Web Developer – SentimenAI.app	
- Engineered end-to-end NLP fine-tuning platform achieving 94% accuracy on classification task, enabling automated training workflows and real-time predictions by integrating web scraping, preprocessing, and model fine-tuning using React.js, FastAPI, and Python. - Developed 18 RESTful API endpoints connecting React frontend to FastAPI backend, enabling real-time model predictions and automated data pipeline operations. - Directed 3-person development team using agile methodology, breaking down faculty requirements into 79+ granular tasks managed via Trello, ensuring clear accountability and on-schedule delivery. - Established automated data collection and preprocessing workflows reducing manual effort by 90%+, processing 37,000+ training samples using BeautifulSoup and Pandas.	

Certifications & Skills

Fullstack Web Development: MERN Stack Course – Web Programming Unpas	Apr 2026
Introduction to Android Mobile Application Development – META by Coursera	Sep 2023
HCIA-AI V3.0 (Artificial Intelligence Associate) – Huawei	Jul 2023
Introduction to Cloud Development with HTML, CSS, and JavaScript – IBM by edX	Jun 2023

Skills: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Redux, Node.js, Python, MySQL, PostgreSQL, MongoDB, Prisma, Git.
