

Adrianus Silalahi

Medan , Indonesia | adrianussilalahi766@gmail.com | +62895332216003 | [LinkedIn](#) | [Portfolio](#) | [Github](#)

Highly disciplined Fullstack Developer and Summa Cum Laude Informatics graduate. Developed and deployed comprehensive web platforms using React.js, Next.js, and Node.js, alongside experience integrating Python-based machine learning workflows. Having directed development teams in academic projects and collaborated within cross-functional agile teams at Telkom Indonesia, I am currently seeking a Fullstack Developer role to deliver high-impact solutions.

Projects Experience

SentimenAI
Team Lead & Fullstack Web Developer – [SentimenAI.app](#)

Medan, Indonesia
Feb 2025 – Jul 2025

- Engineered end-to-end NLP fine-tuning platform with automated hyperparameter tuning, achieving 94% classification accuracy on real-time prediction workflows using React.js, FastAPI, and Python, earning Grade A recognition.
- Led 3-person cross-functional team using agile methodology, breaking down faculty requirements into 79+ tasks managed via Trello, ensuring on-schedule delivery.
- Engineered automated data collection and preprocessing workflows reducing manual effort by 90%+, processing 37,000+ training samples using Python, BeautifulSoup, and Pandas.

Telkom Indonesia
Fullstack Developer Intern

Jakarta, Indonesia
Feb 2024 – Jun 2024

- Engineered 10 user-facing features including chat history, bookmarking, and smart recommendations for internal AI chatbot platform using React.js, Redux, TypeScript, and SCSS.
- Conducted manual QA and regression testing during V1-to-V2 migration, identifying and resolving 26 critical bugs including broken registration flow and mobile UI inconsistencies, ensuring production deployment with zero blocking issues.
- Integrated 15 RESTful API endpoints for real-time conversation handling and secure data synchronization.
- Authored comprehensive technical documentation detailing bug root-cause analysis and system architecture, facilitating seamless knowledge transfer to incoming developers.

Bodat Chic Sec
Founder & Fullstack Web Developer – [bodat-chic-sec.shop](#)

Medan, Indonesia
Mar 2026 – Jun 2026

- Engineered a full-stack e-commerce platform with 13 core features (authentication, product filtering, cart, Midtrans payment, order tracking) enabling online thrift shop operations using Next.js 16, TypeScript, PostgreSQL (Prisma), and Supabase.
- Built a role-protected admin dashboard streamlining product CRUD and order management through real-time analytics tracking 6 key data points (revenue, orders, inventory, pending alerts, stale detection).
- Integrated RajaOngkir API for real-time shipping cost calculation across multiple courier services.

Jagoan Soal
FullStack Web Application – [Jagoansoal.app](#)

Medan, Indonesia
Feb 2026

- Architected and deployed a fullstack AI application using Next.js, TypeScript, and MongoDB (Prisma) designed to eliminate manual textbook cross-referencing and lesson prep bottlenecks for traditional educators.
- Integrated LLaMA 3 via Groq API for curriculum-aligned question generation and engineered a one-click Word (.docx) export pipeline optimized for non-tech users.
- Reduced quiz formulation and curation time by 90%, slashing a traditional 20-minute manual handwriting process down to under 2 minutes per customized exam.

Education

Mikroskil University - B.Comp.Sc. in Informatics (GPA: 3.86/4.00 Summa Cum Laude).

Oct 2021 – Oct 2025

Certifications & Skills

- Fullstack Web Development: MERN Stack Course – Web Programming Unpas
- Introduction to Android Mobile Application Development – META by Coursera
- HCIA-AI V3.0 (Artificial Intelligence Associate) – Huawei
- Introduction to Cloud Development with HTML, CSS, and JavaScript – IBM by edX
